You can also choose the following items:

Floor Plan and Layout, Exterior Colour, Roof and Flashing Colour, Interior Paint Colour, Interior Trim Colour, Flooring, Tapware, Benchtops, Kitchen Cabinet Style and Layout to a certain extent.

To Note:

- Initial deposit will secure your place in line for the next build slot. However, if you would like - we can slot your build in alongside other builds in order to get started earlier (this would mean that your build time is longer than stated below – but you should get your unit quicker). Priority of builds is always given to first in first served basis.
- The design process will be completed in the time between the initial deposit and the start of the build.
- Estimated physical Build time for a Unit is 14-16 weeks from the build start date as long as the design and appropriate deposits have been completed. Unforeseen events and/or material shortages may push the build time out further.
- All connections to the Unit are the Owners responsibility – this includes Waste Water Plumbing, Fresh Water Plumbing, Electrical (Caravan Cable supplied), Internet, TV aerial/Sky Dish etc.
- If you are purchasing the Solar System, then this will be Commissioned and Connected up on site by the seller, – However the Solar Panels are to be placed and secured by the purchaser. This is to be done on suitable supports supplied by the purchaser in a North facing position.
- The Client agrees and understands that the unit does not come with a COC on the building (all electrical and gas is certified and compliant).
- The Client understands and takes responsibility as to where Tiny Houses/Caravans sit with regards to their local Council.
- Delivery Costs and Transport Insurance for the Tiny House is to be paid for by the purchaser.

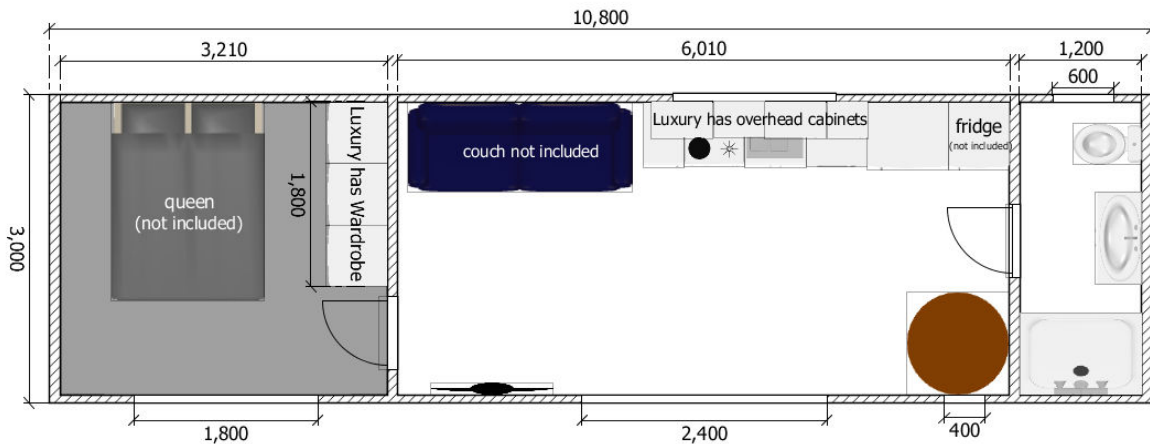

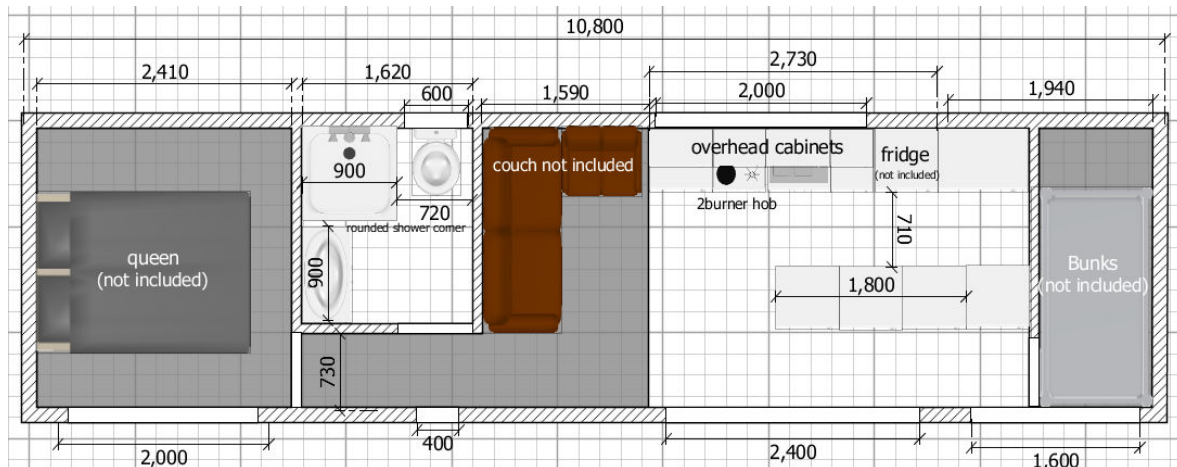

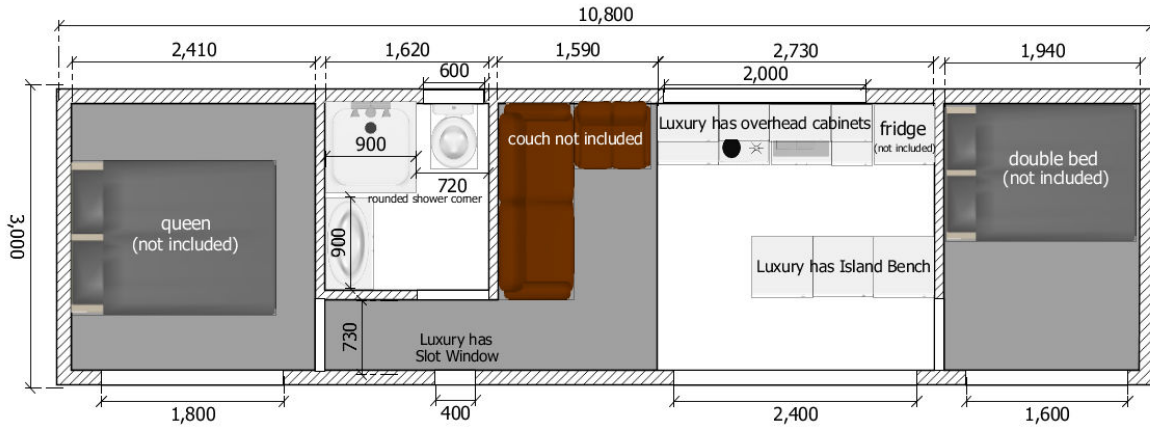

Payment Structure:

- Initial deposit of 10% due on signing of contract to secure build slot.
- Second deposit of 30% due 2 months before build start date so supplies can be ordered.
- Third deposit of 30% due once windows, cladding and roof is complete.
- *(If any other extra options are required including Solar, Composting Toilet, Waste Water etc. then a Fifth Deposit to cover these would be due. Timing and amount is case by case depending on setup)*
- Balance due upon client being satisfied of the completion of their Tiny House. Once balance is cleared, ownership papers are signed over to the client and delivery takes place.

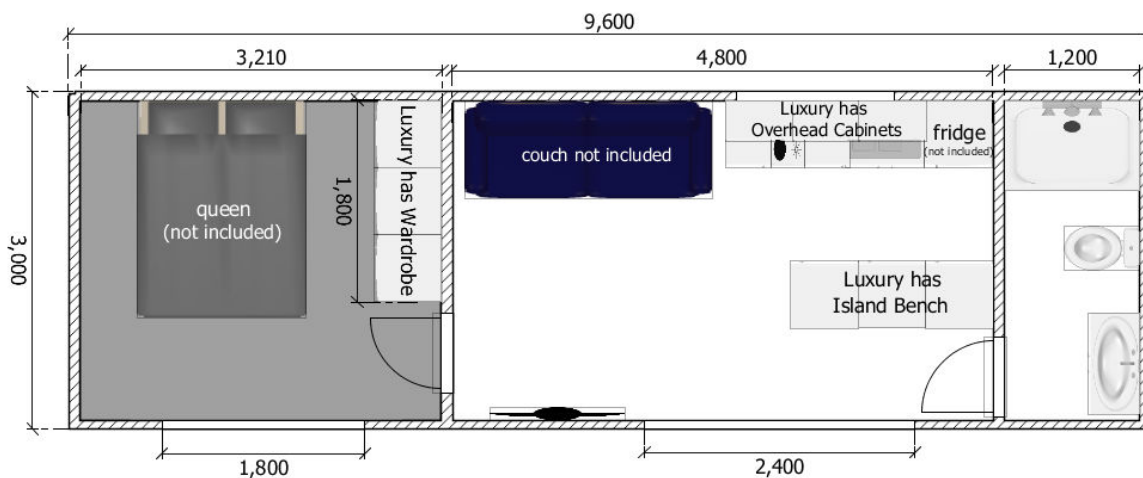

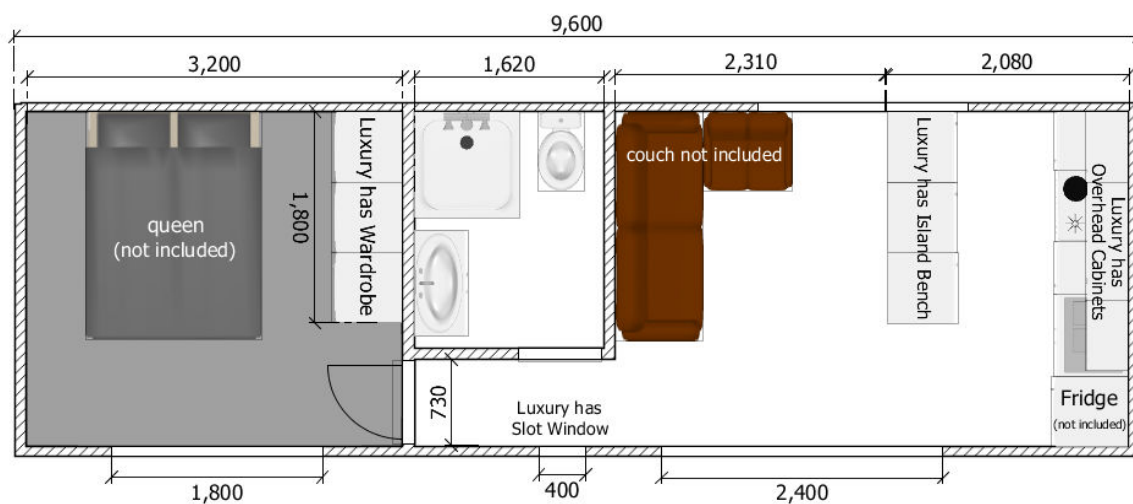

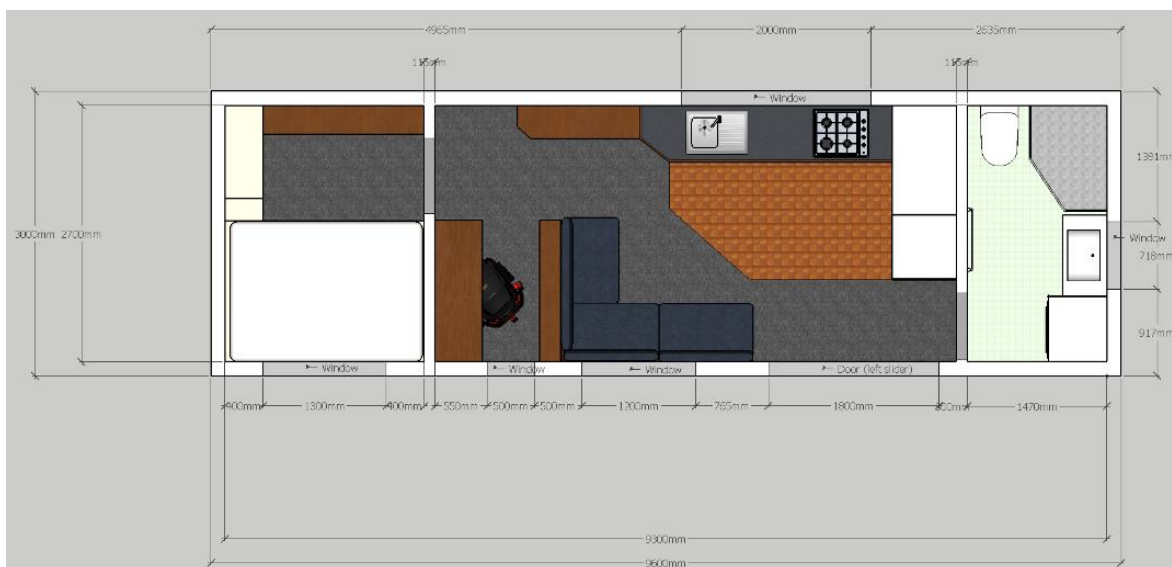

Floor Plans:

Below are some example Floor Plans. You are welcome to use ours or customise your own Floor Plan to suit your own preferences. (There is **NO** extra charge for having your own customised and personalised Floor Plan).
